

Smoltek newsletter, May 2021

Hello,

Here are the highlights of this newsletter:

- CEO interview (video)
- Cost-effective production of green hydrogen
- Martin Lenart new advisor for Smoltek
- Smoltek operational update
- AGM 2021 information
- Presentation from Stora Aktiedagen, May 17 (video)
- Virtual ECTC starts June 1 – Smoltek is program sponsor
- MAQS business lawyers: Covid-impacts on AGM

CEO interview

Interview with Interim CEO Marie Landfors on the company's proprietary technology, the ongoing evaluation license agreement for CNF MIM technology and what's next in the business development. The interview, in Swedish, is produced by Mangold Fondkommision.

Cost-effective production of green hydrogen

For a sustainable production of fossil-free energy the search for 100% green hydrogen production is at full speed – world wide. In this area Smoltek's pioneering carbon nanotechnology can enable manufacturing of more effective cell components in electrolyzers for hydrogen production.

Ellinor Ehrnberg, Head of Smoltek Innovation

Martin Lenart – new operational advisor for Smoltek

Martin Lenart – who has over 30 years of experience from various roles in development, marketing, sales and management - is now stepping in as operational advisor for Smoltek.

"A strategic recruitment", says Ola Tiverman, President of Smoltek Semi.

Summer is around the corner – but Covid-19 is still lurking!

The summer is approaching here at the Swedish Westcoast. Temperatures are rising and the first harvest of fresh potatoes and strawberries can be found at the grocery's. But still, the spread of Covid-19 disease is lurking and is still very active, so keeping distance and just have a few social contacts are mandatory.

At our end we are organizing our work to minimize the risks for our employees, which has so far paid off well. Let's continue to stay safe together by supporting vaccination schemes and obeying rules and recommendations as provided by the authorities.

Stay tuned for more news on our website, newsfeed updates and social media postings.

/Regards,

Marie Landfors, Interim CEO
